

Dr. Xie feedback on project

- ① clear
- ② one story
- ③ unique feature
- ④ network externality
- ⑤ didn't supplementary product compatibility
- ⑥ deemphasis something
- ⑦ Blackbox too many thing { you put too many ingredients in without rational
- ⑧ don't remember thing at the end
- ⑨ argument about why it is important
- ⑩ don't write paper that way
- ⑪ depend on M market size category search
- ⑫ through too much thing there
- ⑬ think about how you can make it better
- ⑭ Confusing
- ⑮ literature say it is positive, but it could be diffusion
- ⑯ capture in one model
- ⑰ dynamic is important based on finding, information diffusion, observational learning, there is not too much
- ⑱ peers around you
- ⑲ think more about finding is it about credibility of information
- ⑳ literature support it ⇒ Probability of moderating role
- ㉑ stop & think about what you have which more too counterintuitive
- ㉒ too many things
- ㉓ Engineering's black box 47 is not good
- ㉔ Nothing Conclusive

- ㉕ conclusion is not clear on 19 different
- ㉖ is this representative selection issue
not general sample
sample itself endogenous
- ㉗ careful about selecting discussion questions
- ㉘ think about more about literature which one is the most
- ㉙ main effect of
- ㉚ incorporate
- ㉛ general & not related to carry over is high
- ㉜ negative is structure the effect is different too separate things
- ㉝ Counter intuitive result
- ㉞ Structure of presentation ㉟ two sided this is done what you found new can have things interesting in the end

- ① structure 10 structural
- ② every couple of days meet & read
- ③ potential of each market
- ④ product elasticity / price

- ① how many versions Firefox
- ② Version of Firefox history

- ① presentation { ① position ② Confusion ③ memory
- ② approach { ① Blackbox ② too much
- ③ motivate why important
- ④ think more about finding
- ⑤ not conclusive
- ⑥ literature
- ⑦ Counter intuitive results
- ⑧ You did not show what you claimed
